ALLOWANCE

1. The amendment filed 5/30/2007 has been placed of record in the file.
2. Claims 1 and 11 have been canceled.
3. Claims 2-10, 12-20, 23, and 24 are allowed.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

Claims 23 and 24 distinguish themselves over the prior art by delineating a method or system for identifying user types in a collection of connected content portions where a document vector is generated for use in determining a multi-modal user path user information need. The claims state the specific use of formulas for generating a document vector and although the prior art may show a previous knowledge of using spreading activation algorithms with collections of documents, there is not shown a system which uses such formulas as those claimed for determining the user path user information need. Thus claims 23 and 24 show a patentable distinction over the prior art. Other important features of the method or system include the ability to determine multi-modal content portion feature information, multi-modal user path information, measures of similarity for the multi-modal user path information, and multi-modal clustering types so that the multi-modal user path information can be clustered. Furthermore, the prior art gives no indication that it would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to identify user types in a collection of connected content portions and determine a user path user information need in the fashion presented in the independent claims.

Art Unit: 2152

Claims 2-10 and 12-20 are allowed due to their dependence on claims 23 and 24.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
